Minimalist Oil Treatment

Description:

"Minimalist Oil Treatment" is a soft and smooth anhydrous formula that provides calming and soothing properties. Applied on the face or the body, this oil treatment is ideal for massaging as it is not too greasy or tacky. Minimalist formulas allow to avoid using preservatives, emulsifiers or fragrances, which can be deleterious to skin cells.

Key ingredients:

- Creaster® Macadamia ET is an ethyl ester derived from Macadamia Oil. Due to its silky and soft skin feel, it is the ideal naturally-derived silicone substitute for any types of skin care applications. It can be used as a base for anhydrous treatments or cleansing products.
- Dedraflow® 8 Luxe is a silicone substitute based on a mixture of Hydrogenated Polyisobutene and Hydrogenated Vegetable Oil. It is an ultra soft emollient, which provides a soft feel and an excellent spreadability to the formulation while improving its photostability.
- Creage® Crystal 10 ISO 16128 is an anhydrous gel based on a mixture of synthetic and natural thickened lipids. It is a transparent viscosity modifier and film former. It forms a pseudoplastic film on the skin, which leaves a silky and smooth after feel.

Ingredient	Phase	INCI Name	Qty%	Function
Creaster® Meadowfoam ET	A	Ethyl Meadowfoamate	38,40%	Moisturising, Emollient
Creage® Crystal 10 ISO 16128		Hydrogenated Vegetable Oil (and) Ethylene/Propylene Copolymer	28,60%	Viscosity modifier, Texture modifier
Dedraflow® 8 Luxe		Hydrogenated Polyisobutene (and) Hydrogenated Vegetable Oil	26,00%	Silicone substitute, Emollient
Vegeflow® 10 ISO 16128		Hydrogenated Vegetable Oil	7,00%	Silicone substitute, Emollient

Procedure

Weigh phase A and put under stirring until homogenization.

Efficacy testing

2 subjects - on the hand:
- Microcirculation decrease of 55% after 5 minutes of application
- TEWL decrease of 20% after 5 minutes of application
