**Minimalist Relaxing Body Butter**  
**Microcirculation : -70%, after 300 s (In Situ relaxation test)**

**Description:**

"Minimalist Relaxing Body Butter" is an oil-based skin care formula that was developed to relax and calm the skin. This buttery texture is ideal for sensitive skin types, as it slowly melts when applied on the skin. Nordic Beauty Avena Finlandia and Vegeflow® 100 ISO 16128 leave a smooth and silky film, which decreases microcirculation and reduces redness. It is a clever minimalist formula.

**Key ingredients:**

- Nordic Beauty Avena Finlandia is a natural oil that concentrates all the benefits of oat (Avena Sativa). It is extremely rich in phospholipids, sterols, essential fatty acids and vitamin E. It is close to a lanolin effect, as it deeply moisturises, repairs and soothes the skin.
- Creabase® MSO is a natural wax based on Meadowfoam Seed Oil. It is ideal for W/O emulsions as it deeply smooths, soothes and softens dry and sensitive skins. It also increases the stability of skin care products.
- Vegeflow® 100 ISO 16128 is a naturally-derived "dimethicone substitute" that provides softness, emolliency and lubricity to formulations. It forms a non-occlusive film and works as a moisture barrier without blocking the skin breathing.

Ingredient	Phase	INCI Name	Qty%	Function
Creabase® MSO	A	Limnanthes Alba (Meadowfoam) Seed Oil (and) Candelilla Cera (and) Hydrogenated Meadowfoam Seed Oil	40,00%	Wax, Texture modifier
Creabase® NTL 80 HVO		Hydrogenated Vegetable Oil (and) Polyethylene (and) Isohexadecane	25,00%	Wax, Texture modifier
Nordic Beauty Avena Finlandia		Avena Sativa (Oat) Kernel Oil	20,00%	Moisturising, Emollient
Vegeflow® 100 ISO 16128		Hydrogenated Vegetable Oil	14,80%	Silicone substitute, Emollient
Lavandula Angustifolia (Lavender) Oil	B	Lavandula Angustifolia (Lavender) Oil	0,20%	–

**Procedure**

Heat up the phase A to 80-90°C and put under stirring until homogenisation.  
When the phase A is completely melted, add phase B and put under stirring.  
Leave to cool down under stirring.

**Efficacy testing**

2 subjects - on the hand:  
Microcirculation decrease of 70% after 5 minutes.
