

*DLC Microscopy*

With our own testing facility  
IVIS Labs® and its large  
equipment of visionary  
analytical machines, we  
provide a complete analysis of  
performance.

*NMR*

*Nuclear Magnetic Resonance*

All our formulas are tested  
allowing to claim benefits.

*FlexSEM*

A new generation of sun  
protection :

*SupraMolecularProtect®*

The new world of colour :

*SupraMolecularColour®*

The future of longevity  
with instant effects

The SP LABS expertise creates :

Mineral filters, intelligent pigments, and long-lasting systems, designed to exceed the current market standards and provide a long-term protection. A new vision for daily care with our mineral filters based on TiO<sub>2</sub>, ZnO and hybrid with BEMT

A new generation of pigments for skin, eyelashes and hair. The Soin Couleur® of the future brings together pigments and protection to transform colour in a real care, day and night. With photostable, oxygen stable and safe coatings whose durable qualities and textures are appreciated.

A visible reduction of wrinkles and marks thanks to SupraMolecularTonic®. This new complexity takes advantage of new non-covalent structures that improve volume and reduce sensitive phenomenons.

Discover some of the SP LABS concepts for the future of innovation :

*YouthDation®*

Give your skin SPF 50+ sun protection with our foundation. Its unique texture glides effortlessly onto the skin, delivering a smooth, even, and radiant complexion. Enriched with high-performance UV filters, it provides effective sun protection while offering a lasting comfort throughout the day.

*YouthClouds®*

Dive into a unique sensory experience with YouthClouds®, an innovative gel-lotion infused with Argon, designed to transform into a light foam upon contact with oxygen in the air. Its formula delivers an instant soothing effect while visibly reducing redness and wrinkles.

*HydraZpHeres® serums*

This serum enriched with advanced hydrating film-forming matrix, enhances hydration, reduces wrinkles, and stimulates dermal microcirculation. This product contains HydraZpHeres®, aqueous pearls based on a sophisticated polysaccharide structure, providing freshness and long hydration to the skin. They enable a controlled release of active ingredients for up to 8 hours.

**The SP Labs' offer**

*Creation of unique formulas according to your needs*

*Bulk production and full attention on innovation*

*A cutting-edge testing laboratory for your formulas*
